MP.129.PC - Posterior Tibial Nerve Stimulators

This policy applies to the following line(s) of business:

- ✓ Premier Health Insuring Corporation MA – DSNP

Premier Health Insuring Corporation considers Posterior Tibial Nerve Stimulators (PTNS) for Treatment of Urinary Incontinence medically necessary for the following indications:

Use of Posterior Tibial Nerve Stimulators is covered for the treatment of adult urinary incontinence when all of the following indications and criteria are met.

1. Member has previously been diagnosed with overactive bladder (OAB) and/or urinary incontinence.
2. Documented failed conservative management efforts (eg. pharmacological treatment, PME, behavioral, etc.) including two anticholinergic drugs taken for at least four weeks.
3. Member is at least 18 years of age.

Limitations

Initial treatment is limited to 30 minute sessions once a week for 12 weeks.

The member must have documented evidence of at least 50% improvement in incontinence symptoms after the initial 12 sessions for continued coverage.

- Continued treatment is covered for 1 session every 1-2 months for no more than 2 years.

Stress and neurogenic incontinence would not be expected to improve with PTNS.

Background

It is estimated that over 25 million adult Americans suffer from urinary incontinence, with women being twice as likely as men to have urinary incontinence. The Mayo Clinic categorizes urinary incontinence into the following types: stress, urge, overflow, functional, and mixed.

Posterior Tibial Nerve Stimulation (PTNS), a minimally invasive procedure, consists of insertion of an acupuncture needle above the medial malleolus into a superficial branch of the posterior tibial nerve. An adjustable low voltage electrical impulse (10mA, 1-10 Hz frequency) travels via the posterior tibial nerve to the sacral nerve plexus to alter pelvic

floor function by neuromodulation. PTNS is used to treat OAB syndrome and associated symptoms.

Codes:

CPT Codes / HCPCS Codes / ICD-10 Codes	
Code	Description
CPT Codes	
64566	Posterior tibial neurostimulation, percutaneous needle electrode, single treatment, includes programing
ICD-9 codes covered if selection criteria are met:	
788.30	Urinary incontinence unspecified
788.31	Urge incontinence
788.33	Mixed incontinence (Male) (Female)
788.63	Urgency of urination
ICD-10 codes covered if selection criteria are met:	
N39.41	Urge incontinence
N39.42	Incontinence without sensory awareness
N39.44	Nocturnal enuresis
N39.45	Continuous leakage
N39.46	Mixed incontinence
N39.490	Overflow incontinence
N39.498	Other specified urinary incontinence
R32	Unspecified urinary incontinence
R39.15	Urgency of urination
